Application No.

Application/Control Number: 09/759,567

"Outlied Hamber: 66/166,66

Art Unit: 1761

Applicant is reminded of the duty to disclose to the Office all information known to the person to be material to patentability.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 47 and 57 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 47 and 57 are indefinite as the claims do not further limit as the independent claims are directed to a baked product.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 41-60 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takemori et al, Kim, and Pflaummer et al.

Takemori et al disclose a foodstuff, including baked products, containing xylitol, whey protein, and a soluble dietary fiber (see entire patent and the claims, especially claims 1, 2 and 13).

Kim discloses a light bakery product comprising xylitol, a calcium salt, and a stabilizer (see entire document, especially column 2, lines 40-48 and Examples I and III).

Pflaummer et al disclose the use of fiber in baked goods (see entire document).

Application/Control Number: 09/759,567

Art Unit: 1761

The claims differ as to the specific amounts and the specific utilization.

The prior art teaches the use of xylitol, whey protein, and fiber/stabilizer as conventional in the art.

Once the art recognizes the use of a given component for a specific function then the use and manipulation of this component would be no more than optimization, see In re Boesch 205 USPQ 215.

Applicant is using known components for their art-recognized function to obtain expected results.

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use the claimed component amounts in a baked product because the prior art teaches the conventional use of the claimed components in a baked product.

Attention is invited to In re Levin, 84 USPQ 232 and the cases cited therein, which are considered in point in the fact situation of the instant case, and wherein the Court stated on page 234 as follows:

This court has taken the position that new recipes or formulas for cooking food which involve the addition or elimination of common ingredients, or for treating them in ways which differ from the former practice, do not amount to invention, merely because it is not disclosed that, in the constantly developing art of preparing food, no one else ever did the particular thing upon which the applicant asserts his right to a patent. In all such cases, there is nothing patentable unless the applicant by a proper showing further establishes a coaction or cooperative relationship between the selected ingredients which produces a new, unexpected, and useful function. In re Benjamin D. White, 17 C.C.P.A (Patents) 956, 39 F.2d 974, 5 USPQ 267; In re Mason et al., 33 C.C.P.A. (Patents) 1144, 156 F.2d 189, 70 USPQ 221.

Application/Control Number: 09/759,567

Art Unit: 1761

Applicant's arguments with respect to claims 41-60 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie Wong whose telephone number is 571-272-1411. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
